Quick Assessment Creation

Quickly create effective assessments using a customized question pool based on topic, subject, group, type, and more. Easily set assessment behavior—duration, question order, answer visibility, and scoring. Enhance the experience with images, links, hints, feedback, and embedded videos.

Multilingual Assessments

Enhance multinational workforce performance by enabling assessments in their native languages. iKAT supports over 11 languages for assessment screens, controls, and login pages. Use its Translation Management System to streamline translations and manage localized content as needed.

Categorize Your Questions

Categorize questions by topic and group, then pull an unlimited number of single or multi-leveled topics into any assessment.

Mobile Compatibility

Enhance iKAT's accessibility by making exams available on iOS and Android devices. Employees can access their exams anytime, ensuring timely qualifications to meet company requirements and goals.

Optimal Results with Question Types

Create effective knowledge assessments by choosing the best question types—multiple choice, multiple answer, true/false, yes/no, and matching items. Mix these for an engaging experience and optimal scoring.

Reporting and Analytics

iKAT provides various pre-defined reports and analytics, including item analysis, test analysis, score tracking, and survey reporting, allowing you to evaluate and share results with stakeholders.

Automatic Grading

Maximize automated assessment grading with customized scores and weights per question, and integrated qualification updates. Control whether test takers see their scores immediately, receive them from the trainer, or do not see them at all.

FDA Compliant

Ensure compliance with FDA, cGMP, CFR 21 Part 11, and other regulations through robust security management, including login, electronic signatures, and audit trails. All activities are automatically tracked, documented, and available for auditing.
