

iTrain[®]
Training System Interface

iTrain

Training Data Integration made Simple.

iTrain, ISOtrain's interface to third-party training tools, automatically synchronizes training data between ISOtrain and your software. This seamless integration eliminates manual maintenance, ensuring regulatory compliance without human intervention.

Wizard Approach

Configure iTrain to integrate ISOtrain with your training tools. Map records, file locations, customize tracking, versioning, and output preferences, with automatic electronic signatures and email notifications.

Scheduled Processing

Perform an initial load and schedule automatic uploads of employee training data into ISOtrain. Scripts handle access, validation, error tracking, notifications, and data uploads directly into ISOtrain's database without user intervention.

Automated Data Validation

Eliminate data entry errors with automated uploads and validations, giving you full control over which training data is added to ISOtrain. Perform data maintenance efficiently, and manage errors through logs, emails, and reports. iTrain boosts productivity, freeing up time for trainers to focus on their tasks.

Integrated Training Tools

Access iTrain using your ISOtrain credentials and seamlessly integrate with multiple training tools, maximizing resources while ensuring compliance with industry regulations.

Customize your Data Definition

Define file mapping for each training tool, set upload sources, field attributes, record criteria, processing flags, and manage output file directories and sizes.

Customize your Processing

Pre-set your upload schedule by start date, frequency, and time. Define file locations, manage logs for uploads and errors, track versions, and enable electronic signature auditing.

Customize your Notifications

Select the notifications you want to receive, specify delivery methods, and configure your email domain and SMTP settings. Customize messages for uploads, errors, and restrictions, and automatically get all update information for evaluation and cross-application compliance.

FDA Compliant

Ensure compliance with FDA, cGMP, and CFR 21 Part 11 regulations through ISOtrain's robust security management, including secure login, electronic signatures, and audit trails. All upload and validation activities are automatically tracked and documented for easy auditing.
